

CLEANING PROCEDURES

We maintain high standards for our housekeeping staff. In addition to routine cleaning, housekeeping staff are following CDC guidelines for *Cleaning and Disinfecting Public Spaces, Workplaces, Businesses, Schools, and Homes* (<https://www.cdc.gov/coronavirus/2019-ncov/community/reopen-guidance.html>)

- Housekeepers will self report their temperature each morning.
- Housekeepers are using gloves and masks.
- Housekeepers are using EPA approved disinfectants, see link above for specific information.
- Linens are washed between guests and bed covers (quilts, bedspreads) are changed between guests. In some cases decorative covers, pillows and other bedding have been removed from beds.
- In addition to routine cleaning, housekeepers will pay extra attention to frequently touched surfaces and objects.
- Guests are checking in a minimum of 6 hours apart to allow for thorough cleaning.
- A hand sanitizer pump is provided for guest use during their stay.
- A spray bottle with cleaning solution of diluted household bleach will be provided for guests to clean during their stay. It is recommended by the CDC in the link above.

ADDITIONAL INFO FOR OUR GUESTS

- Please use hand sanitizer in common areas (if applicable). A hand sanitizer pump is provided for use during your stay.
- Please maintain social distancing of 6 feet of separation between guests in common areas such as the pool, beach, hallways etc.
- All beachgoers are encouraged to comply with CDC social distancing measures and must limit groups to <10.

Thank you for your partnership in this process. Enjoy your stay!
